RE: School Based Dental Program

James River Dental Clinic, a division of Johnson Health Center, is pleased to announce that starting in January 2018 we will partner with Amherst County Public School to provide primary and preventative dental care to students.

Dental Care will include exam, cleaning and fluoride treatment. Students on Medicaid, FAMIS and Private insurance are eligible. If your child currently has no dental insurance and receives Free/Reduced lunches, the dental services are available for a \$25.00 fee. Attached you will find our dental form that will need to be completed and turned back into your child's school with payment (if your child does not have dental insurance). If your child has dental insurance, please make sure the insurance information is completely filled out including policy number as well as the name and date of birth of policy holder. *Please note: If your child has had a cleaning within the past 7 months, insurance will not cover the dental care provided.*

If you would like your child to participate in this program, please return completed form with payment back into your child's school as soon as possible. If you have questions, please call our office between 8:00a- 5:00p and will be happy to help, or you can call your child's school for more information.

We look forward to making sure Amherst students have healthy smiles!

Thank you,

James River Dental Clinic
